

PROFILE

Software engineer who builds business web systems and runs the infrastructure under them. Designed and built a full ERP for an oil and contracting company on .NET 8 and Vue 3, shipped client websites in Syria and Sweden, and managed company servers, networks, backups and support as IT Manager.

EXPERIENCE

- IT Manager**
Al-Raddawi Contracting & Oil Services, Damascus

01/2024 – 05/2026

 - Ran the company servers, network, computers, printers and security systems.
 - Designed and built the company ERP system (C# / .NET 8, EF Core, SQL Server, Vue 3).
 - Owned websites, hosting, domains and business email.
 - Set up backup, disaster recovery and data protection.
 - Managed vendors, internet providers and IT projects, and trained staff.
- Web Developer**
TekSite Software

01/2021 – 10/2024

 - Built multiple client websites on WordPress.
- IT Supervisor**
Kalinda General Trading

01/2023 – 01/2024

 - Technical support across hardware, software and network issues.
 - Installed and maintained computers, servers and printers; ran backups and monitored security.
 - Updated the company website and supported digital marketing.
- IT Supervisor**
United Company for Development, Beirut

01/2020 – 01/2023

 - Diagnosed and tuned Windows systems and implemented security measures.
 - Supported staff, kept software and hardware up to date, and planned replacement costs.
